

Physics 113 will use a web-based homework delivery system. To complete this homework, you must access the web site:

<http://www.webassign.net/login.html>

At the login prompt, you enter your username, institution, and password. Your username is your last-name followed by the first initial of your first name. For example, if your name is Robert Jacob Smith, your username would be SmithR. The login is not case sensitive, so either upper or lower case should work.

The proper response for **Institution ?** is sdstate.

Your initial password is a lowercase “p” plus last four digits of your student ID number. You may wish to change this to something easier to remember, which is a good idea. If your number was 6540123, your password will be p0123.

Log on to this site as soon as possible to familiarize yourself with the procedure. Also, there is a Student Guide available which you should read.

If you have trouble accessing this site, or if something does not appear to be working correctly, contact me immediately. It is your responsibility to complete the homework assignments and to do it by the appropriate deadlines.

There is also a course web-site:

<http://www.engineering.sdstate.edu/~physics/courses/p113oq.html>

General information about the course, schedules, syllabus, and a link to the homework site is available here. I also hope to put grading and score information on this site. I will not post your score information without your permission. If you submit a signed note from you with a four digit alpha-numeric code on it, your scores can then be posted under this number.
